GovernorHub

Online technology to assist the smooth-running of your School Governing Board or Multi-Academy Trust Board

GovernorHub is an online tool that lifts the chores of school governance from your shoulders so you can focus on the big picture.

It supports the organisation, preparation and document storage of all your board papers and creates easy ways for trustees and local governors to communicate with each other.

It is a web-based service allowing you access from school, work, home or wherever you have internet access with no need to spend hours installing software on your computer.

Key Benefits

- GovernorHub keeps communication simple and confidential with notice-boards and document storage facilities - all with state of the art encryption.
- It allows flexible working on a variety of devices through apps and its online server.
- Database access for larger MATs and academy chains to manage lists of governors, members and trustees across the whole MAT or chain.

Modern Solutions for Traditional Governance

Subscribe to receive your own area where you will have access to:

- A noticeboard; Forget about keeping track of everyone's email addresses. Post an item on the noticeboard and GovernorHub will email the relevant committees for you.
- A document storage area; struggle to find the latest version of a document, or can't remember where you saved those model policies? With GovernorHub all your documents are kept in one place and are easily searchable.
- A news feed; helping you keep up to date with national and local news.
- A meeting calendar; instead of manually updating your calendar whenever a meeting is rescheduled, GovernorHub has a single calendar that you can sync to your various devices. It also allows you to share documents.
- Membership management tools; for clerks and assigned

users GovernorHub has a whole host of tools that make managing the board a breeze. From keeping track of the constitution, committees and roles to updating contact details and terms of office.

GovernorHub also helps to make managing governance and sharing information across a multi academy trust much easier thanks to the following additional features:

- Each of your Local Governing Boards, plus your Trust Board will have an area on GovernorHub. Members of the Local Governing Boards can only see their papers and details but members of the Trust Board can see the papers and details for academies in the trust.
- Shared news, calendar and resources; store resources that all of your Local Governing Boards can access, send news and information and see every meeting across the trust on a shared calendar.

"I've a busy life so this is perfect with all the links in one place. The clerk uploads all agenda and documents etc making this very accessible wherever you are. Very helpful."
